*Subject:* Grant Economic Indicator Analyst Role to Homeless Liaisons

#### WISEdash for Districts

DPI has implemented a new way of displaying and disaggregating student graphs by student homeless status in WISEdash for Districts. This new option will appear in the “Group By” filter as well as in an additional, separate filter for Homeless status for users with the Economic Indicator Analyst role.

We encourage districts to grant homeless liaisons the Economic Indicator Analyst role in WISEdash for Districts so they are able to review district homeless student data. Access is locally controlled and is granted via the District Security Administrator for the application. We also encourage homeless liaisons to connect with their district WISEdata contact to work together to ensure the Homeless data is captured correctly in the Student Information System, and subsequently correct in WISEdash for reporting purposes.

#### How To Request Access to WISEdash for Districts

Request access from your District Security Administrators in your district.

- Use the [District ASM Security Administrators lookup](#) to request access.
- You will need to request the Economic Indicator Analyst role.
- The form will prompt you to create a WAMS ID if you do not already have one.

#### Support

***Who can I contact if I have questions about accessing WISEdash for Districts?***

Start a [WISEsupport ticket](#) and someone will respond to you shortly.

***Where do I go to find out more information about Secure Home?***

DPI's [Secure Home Information Page](#)

***I need help creating a WAMS ID.***

Please review the [WAMS Quick Start Guide](#) for information and instructions.

***How can I find out more information about snapshots?***
